To: Hiring Team

Company: Upcision

Role: Lead Verification Specialist & Appointment Setter

Dear Hiring Team,

As an independent lead generation specialist who builds and runs high-volume B2B outbound campaigns, I was immediately drawn to the Lead Verification Specialist role at Upcision. I understand that the space between an initial reply and a qualified meeting requires natural, confident conversation and quick thinking—exactly the skills I rely on daily to convert interest into booked calls.

Through my independent practice, CLG Project, I take full ownership of the lead generation cycle. I source prospects, run targeted cold email campaigns via Instantly.ai, and handle all inbound replies. By consistently engaging with US business owners and navigating objections on the fly, I generate 5–10 qualified leads per week. I am highly comfortable making high-volume calls, working without a rigid script, and doing what it takes to get sales-ready leads onto the calendar.

I would welcome the opportunity to discuss how my hands-on experience in B2B lead generation and appointment setting can help Upcision turn more campaign replies into qualified meetings.

Sincerely,

Daniil Kotelevets
