**To:** Hiring Team

**Company:** 8x

**Role:** Global Sales (US & UK)

---

Dear Hiring Team,

I am writing to apply for the Global Sales role at 8x. Your mandate to find an "owner," an "AI-native," and a "system builder" who doesn't wait for a playbook perfectly describes my approach to B2B outbound. I am hungry to build something from the ground up, and I have the technical and strategic foundation to execute it.

When I launched my independent B2B lead generation practice (CLG Project), there was no playbook—I had to build the machine myself. I designed my own go-to-market strategy, scraped databases using Python to build highly targeted lists of over 500 decision-makers, and automated the outbound workflow with Make.com. Because I operate natively with AI, I leveraged tools like Claude and Antigravity CLI to rapidly write, test, and refine messaging sequences across Email and LinkedIn. By relentlessly tracking my KPIs in Apollo.io and Salesforce, I turned manual outreach into a repeatable engine that consistently generated 5–10 qualified leads weekly and booked discovery meetings with US executives.

I don't just want to send emails; I want to own the pipeline, unstick stalled deals, and build a scalable sales system for 8x across the US and UK markets. I am highly flexible, fully prepared to overlap with US and European working hours from Spain, and ready to prove my execution speed during the 2-week trial.

Let's build this machine together.

Sincerely,

**Daniil Kotelevets**
