Company: ANTEATER SEARCH

Role: Junior Outbound Sales Representative

Dear Hiring Team,

As a motivated Lead Generation Specialist who built a successful, fully remote outbound system from scratch, I am very excited to apply for the Junior Outbound Sales Representative role at your fast-growing international fintech client. I am highly comfortable working independently and thrive in fast-paced, global environments.

In my independent practice, I have extensive, hands-on experience using LinkedIn Sales Navigator and Apollo.io—the exact tools highlighted in your job description. Using these platforms alongside structured ICP criteria and data-scraping workflows, I successfully researched, sourced, and qualified over 500 B2B prospects. By writing and A/B testing cold email sequences, I consistently generated 5–10 qualified leads per week and converted this outreach into scheduled discovery meetings with decision-makers. My strong written and spoken English, combined with rigorous tracking of all outreach activities, ensures a professional and result-oriented approach to pipeline generation.

I am eager to bring my outbound prospecting skills and technical aptitude (BSc Multimedia Engineering) to the fintech space. I would welcome the opportunity to discuss how I can help generate leads and achieve meeting booking targets for your sales team.

Sincerely,

Daniil Kotelevets
