Professional Summary

B2B Lead Generation Specialist with hands-on experience building net-new outbound pipelines from scratch targeting US decision-makers. Highly technical and self-directed, combining advanced prospecting infrastructure setup with consistent execution to drive discovery meetings. Eager to leverage technical adaptability and outbound workflows to generate pipeline for Action1's endpoint management platform.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote

- Built and ran an end-to-end outbound system from scratch—prospect sourcing, list enrichment, campaign sequencing, and inbox/domain infrastructure—with no team or budget support.
 - Sourced and qualified 500+ B2B prospects using structured ICP criteria and data-scraping workflows, then segmented them for targeted outreach.
 - Wrote and A/B tested cold email sequences using AI copywriting tools, iterating on subject lines and CTAs to improve open and reply rates.
 - Generated a consistent 5–10 qualified leads per week and converted outreach into 3 discovery meetings with US decision-makers.
 - Set up and maintained sender domain health (SPF, DKIM, DMARC) and mailbox warm-ups to protect deliverability across multiple sending domains.
 - Originally targeted US-based Home Services companies before pivoting to the Shopify/e-commerce space to analyze conversion issues and connect owners with agency partners.
-
