To: Hiring Team

Company: Action1

Role: Business Development Representative

Dear Hiring Team,

As a highly technical B2B Lead Generation Specialist who built a net-new outbound pipeline from scratch targeting US decision-makers, I am eager to bring my execution-focused approach to Action1's fast-growing endpoint management team.

Operating completely self-directed, I successfully built an end-to-end outbound infrastructure without budget support. I sourced and qualified 500+ B2B prospects, resulting in a consistent 5–10 qualified leads per week and 3 discovery meetings with US buyers. While my previous focus was on e-commerce, I possess a strong technical foundation—I routinely use Python for data extraction, manage API-driven automations, and configure complex domain infrastructures (SPF, DKIM, DMARC). I am highly comfortable learning technical products rapidly and am excited to apply this capability to effectively engage CIOs and CISOs regarding patching and endpoint visibility.

I excel in autonomous environments where generating net-new pipeline requires resilience and systematic A/B testing. I would welcome the opportunity to discuss how my technical adaptability and outbound execution can help scale Action1's pipeline.

Sincerely,

Daniil Kotelevets
