To: Hiring Team

Company: AidQuest

Role: Business Development Representative – AI & Home Care Technology

Dear Hiring Team,

I am writing to apply for the Business Development Representative position at AidQuest. As someone who personally builds and relies on AI automations (Claude, Make.com, Antigravity CLI) to power my own lead generation, I deeply understand how transformational AI Voice Agents and Human+AI workflows can be for traditional industries.

Through my independent B2B lead generation practice (CLG Project), I developed a highly automated outbound engine from scratch. I built data-scraping workflows in Python to source and qualify over 500 B2B prospects, tracked every interaction meticulously in Salesforce and Apollo.io, and successfully generated 5–10 qualified leads per week. By rigorously A/B testing my sequences across Email and LinkedIn, I converted cold outreach into 3 booked discovery meetings with US executives.

While my direct experience lies in building automated digital outbound systems rather than home care or phone-based sales, my daily hands-on work with AI products allows me to quickly grasp and clearly articulate AidQuest's technology to agency owners. I am highly motivated, accustomed to fast-moving environments, and eager to bring a data-driven approach to your sales team.

Sincerely,

Daniil Kotelevets
