To: Hiring Team, Alkali

Role: Sales Development Representative

Dear Hiring Team,

As a highly organized B2B Sales Development Representative with a track record of executing defined outbound playbooks, I am excited to apply for this contract role at Alkali. I appreciate a structured environment where strategy is set, feedback is fast, and the focus is on pure execution.

In my current practice, I own the conversation from initial prospect engagement through to booking and confirming meetings. I am deeply familiar with maintaining pristine CRM records (HubSpot, Salesforce) and managing high-volume sequence automation tools like Instantly.ai (highly comparable to Smartlead). I understand that a slow reply is a lost deal, which is why I prioritize rapid, disciplined follow-ups to ensure every lead is thoroughly qualified against a strict profile.

While my outreach and qualification strategy relies exclusively on digital channels (Email and LinkedIn) rather than cold calling, my ability to break complex markets into actionable digital steps delivers highly predictable results. Through this digital-first execution, I consistently generate 5–10 qualified leads and book 3 discovery meetings per week.

I am fully available to work 40 hours a week on US time zones and am ready to execute your playbook.

Sincerely,

Daniil Kotelevets
