To: Manon Cortiade & Hiring Team

Company: Anteriad

Role: US Market-Business Development Representative B2B - Afternoon shift

Dear Manon Cortiade and the Hiring Team,

As a target-driven Lead Generation Specialist who has spent the last year directly targeting the US market, I am very excited to apply for the Business Development Representative role at Anteriad. My experience generating leads and booking meetings with US-based decision-makers aligns perfectly with your goal of executing warm handovers without the pressure of full-cycle selling.

Operating my own independent practice, I successfully sourced and qualified over 500 B2B prospects using structured ICP criteria. By initiating conversations and presenting tailored value propositions, I consistently generated 5–10 qualified leads per week and set up discovery meetings with senior leaders. I am highly comfortable logging all interactions in CRM platforms like HubSpot and Salesforce. Furthermore, I actively integrate AI tools like ChatGPT into my daily workflow to optimize my outreach and improve conversion rates, matching the innovative tech environment at Anteriad.

My current university schedule is highly flexible, making me perfectly suited to work a consistent afternoon shift (14:00 – 20:00). While I am currently based in Alicante, I am extremely motivated by the opportunity to join your dynamic campus in Las Rozas and am open to discussing relocation to the Madrid region. I look forward to the possibility of generating high-value opportunities for your team.

Sincerely,

Daniil Kotelevets
