To: Hiring Team, BX Studio

Role: Business Development Representative

Dear Hiring Team,

As a highly organized Business Development Representative with direct experience generating pipeline for web development and CRO agencies, I was immediately drawn to this role at BX Studio. Knowing that you prioritize deeply researched, individualized outreach over high-volume, automated AI messaging, I am confident my meticulous approach to prospecting makes me an ideal fit.

Through my independent lead generation practice, my entire focus has been on researching target accounts, evaluating their current websites and digital friction points, and connecting them with specialized digital agencies. I firmly believe that the most qualified sales meetings are booked by treating prospects as individuals, which is why I invest significant time into understanding a brand's UX/UI and digital presence before initiating contact.

I am highly disciplined in managing these interactions through HubSpot, ensuring accurate CRM records and persistent, thoughtful follow-ups. While I do not have 4+ years in the industry, my direct experience selling digital agency services—combined with my current technical studies in Multimedia Engineering (covering web design, UX, and SEO)—allows me to speak confidently and credibly with decision-makers.

I am highly adaptable, comfortable creating custom video outreach, and fully capable of operating as a remote contractor aligned with US hours. I would welcome the opportunity to discuss how my quality-first approach to outbound can book qualified meetings for BX Studio's Account Executives.

Sincerely,

Daniil Kotelevets
