To: Hiring Team

Company: Capifiq.ai

Role: Sales Executive – B2B SaaS

Dear Hiring Team,

I am writing to apply for the Sales Executive position at Capifiq.ai. Because I actively build and run automated B2B outbound engines using AI tools like Claude, Python, and Make.com, I intimately understand both the power of AI and how easily it can be misused in environments like remote technical interviews. Capifiq's mission to protect hiring integrity immediately caught my attention.

Through my independent B2B lead generation practice (CLG Project), I developed a highly automated outbound system from scratch. I sourced and qualified over 500 B2B prospects, tracked every interaction meticulously across the exact stack you use (HubSpot, Apollo, Salesforce, LinkedIn Sales Navigator), and successfully generated 5–10 qualified leads per week. By rigorously A/B testing my sequences, I converted cold outreach into 3 booked discovery meetings with US executives.

While my background is not explicitly in selling to HR or recruiting teams, my deep technical fluency in AI allows me to quickly grasp and confidently communicate Capifiq's value proposition to both technical and business buyers. Additionally, while my outbound methodology relies exclusively on structured digital channels (Email and LinkedIn) rather than cold calling, this highly automated approach enables me to predictably generate qualified pipeline at scale. I would be thrilled to bring my execution-focused approach to your early-stage team.

Sincerely,

Daniil Kotelevets
