To: Hiring Team

Company: Cast AI

Role: Founding Business Development Representative | Kimchi

Dear Hiring Team,

I am writing to apply for the Founding Business Development Representative role for Kimchi at Cast AI. Your mission to build an outbound engine using AI, automation, and workflow design perfectly aligns with my expertise. I run my own B2B lead generation practice (CLG Project) where my entire pipeline-generation motion is built on the exact AI-augmented strategies you are looking for.

Instead of following a fixed, manual playbook, I use Python to scrape target accounts, Make.com to design automated workflows, and LLMs (Claude) to deeply personalize my email and LinkedIn sequences at scale. This technical approach allows me to continuously improve my outbound engine and generate 5–10 qualified leads per week. Furthermore, my background in Multimedia Engineering gives me a strong foundational understanding of software architecture, AI infrastructure, and developer tooling, allowing me to translate complex products into clear messaging for technical buyers.

While I do not speak French or German, I am highly fluent in English and Spanish. My AI-augmented digital outreach consistently outperforms traditional cold-calling metrics across European and US markets, allowing me to book meetings directly with executives. I thrive in entrepreneurial, ambiguous environments and would be thrilled to build Kimchi's outbound engine from day one.

Sincerely,

Daniil Kotelevets
