To: Hiring Team

Company: Equanimio.AI

Role: Business Development Representative (Early Career)

Dear Hiring Team,

I am writing to apply for the Business Development Representative role at Equanimio.AI. Because I actively build and run outbound engines using AI tools like Claude, Make.com, and Antigravity CLI, I understand firsthand how rapidly enterprises are adopting AI—and why Equanimio.AI's security and governance platform is absolutely critical to protect their knowledge assets.

Through my independent B2B lead generation practice (CLG Project), I developed a highly automated, AI-driven outbound system from scratch. I utilized Python to scrape and qualify over 500 B2B prospects, tracked all activity meticulously in Salesforce and Apollo.io, and successfully generated 5–10 qualified leads per week. By rigorously A/B testing my email and LinkedIn sequences, I converted cold outreach into 3 booked discovery meetings with US executives.

While my direct experience lies in building automated lead generation systems rather than cybersecurity, my daily hands-on work with AI products allows me to quickly grasp and articulate Equanimio.AI's value proposition to technical stakeholders. I focus entirely on high-volume, data-driven digital outreach to build pipeline, and I am highly motivated to bring this scalable approach to your sales team.

Sincerely,

Daniil Kotelevets
