To: Hiring Team, Eurovensys

Role: Lead Generation Specialist

Dear Hiring Team,

As a highly driven B2B Lead Generation Specialist with direct experience targeting the US market, I am excited to apply for the Lead Generation position at Eurovensys. With a proven track record of building outbound sales pipelines from the ground up, I am confident in my ability to find, qualify, and nurture decision-makers for your HealthTech cloud-based solutions.

For the past year, I have successfully operated an independent B2B lead generation practice (CLG Project) targeting US-based companies. Using structured ICP criteria and tools like Apollo.io and LinkedIn Sales Navigator, I sourced and qualified 500+ prospects. By executing A/B tested outbound email and LinkedIn campaigns, I generated a consistent 5–10 qualified leads per week and converted them into 3 discovery meetings with US decision-makers. My process relies on precise data extraction, rigorous CRM management (HubSpot/Salesforce), and highly targeted messaging to build a strong pipeline.

While my background is primarily in digital services, my current studies in Multimedia Engineering give me a strong technical foundation to quickly grasp complex cloud-based software products and clearly communicate their value to medical practices and clinics.

I thrive in goal-oriented environments and am eager to bring my proactive, hunter mindset to Eurovensys. I would welcome the opportunity to discuss how my disciplined outbound approach can help expand your HealthTech footprint in the US market.

Sincerely,

Daniil Kotelevets
