Professional Summary

Highly technical and creative B2B Sales Development Representative specializing in AI-driven outbound growth. As the founder of an independent lead generation practice (CLG Project), I build custom outbound systems—acting much like a power-user of Clay—by integrating Apollo.io, Make.com, and LLMs (Claude/Python) to execute hyper-personalized campaigns at scale. With ~1.5 years of experience booking qualified demos for B2B tech and agency clients, I am ready to bring my "sales hacks" and rigorous CRM discipline to ImpersonAlly to help global brands stop impersonation and fraud.

Experience

Founder & B2B Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent Practice, Remote (Europe)

- Owned end-to-end outbound lead generation, building strong pipelines of qualified prospects across the European and UK B2B markets.
 - Booked a consistent 5-10 high-quality discovery demos per week by deeply researching target accounts and crafting highly relevant outreach angles.
 - Engineered custom "sales hacks" using Python, Make.com, and Claude to scrape buying signals and automate hyper-personalization, drastically improving demo conversion rates.
 - Created, tested, and iterated outbound campaigns across Cold Email and LinkedIn, tracking A/B test results to learn quickly and scale what works.
 - Managed accurate prospect data and pipeline velocity within HubSpot and Salesforce, utilizing Apollo.io and Sales Navigator for precise audience building.
 - Gathered and shared market signals and customer feedback with clients to refine their positioning and ideal customer profiles (ICP).
-
