To: Hiring Team

Company: ImpersonAlly

Role: Sales Development Representative (SDR)

Dear Hiring Team,

ImpersonAlly is solving a massive problem using AI, and your requirement for a "hungry, creative SDR" who uses "sales hacks" to open doors is exactly how I operate my daily pipeline.

I run my own B2B lead generation practice (CLG Project) where I act as the growth engine for multiple tech clients. Instead of manually clicking through Sales Navigator, I build automated workflows—using Make.com, Python, and Claude—that replicate the power of tools like Clay. This allows me to scrape specific buyer signals, hyper-personalize my outreach angles on LinkedIn and Email, and consistently book 5-10 qualified demos every week.

Regarding the requirements: while I am highly proficient on the phone for qualifying replies and running discovery, my highest-converting "sales hack" is executing ultra-targeted digital outbound that generates warm interest organically. Furthermore, while I am based in Europe (Spain) and operate with fluent, professional-level English rather than being a native speaker, I regularly convert US and UK decision-makers through flawless written communication.

I am comfortable moving fast, working independently, and collaborating with product teams based on market signals. I am ready to test, learn, and scale ImpersonAlly's outbound pipeline.

Sincerely,

Daniil Kotelevets
