Professional Summary

BSc Multimedia Engineering student and independent founder with a strong track record of using AI and automation tools to build operational infrastructure from scratch. Highly proactive and analytical, with hands-on experience designing end-to-end data workflows, utilizing automation (Make.com, Python), and leveraging agentic AI (Claude, Antigravity CLI) to streamline operations and eliminate manual bottlenecks. Eager to apply this entrepreneurial and technical foundation to operations and strategy at a fast-moving healthtech startup.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote.

- Built and ran end-to-end operational systems from scratch—including data-scraping workflows, list enrichment, and technical domain infrastructure—with no team or budget support.
- Leveraged AI and workflow automation tools (Make.com, Python) to eliminate manual bottlenecks, allowing the system to process high volumes of data efficiently.
- Sourced and qualified 500+ prospects using structured criteria, organizing and segmenting complex data for targeted outreach.
- Wrote and A/B tested outreach sequences using AI copywriting tools, iteratively analyzing performance metrics to improve response rates.
- Generated a consistent 5–10 qualified leads per week and converted outreach into 3 discovery meetings with US decision-makers.
- Managed technical infrastructure independently, setting up and maintaining sender domain health (SPF, DKIM, DMARC) across multiple domains.
