To: Hiring Team

Company: Jobgether (Partner Company)

Role: Business Development Rep (AI Cloud)

Dear Hiring Team,

I am writing to express my interest in the Business Development Rep (AI Cloud) role. While my direct experience has been in the e-commerce sector—analyzing technical web issues and connecting businesses with web development agencies—I've built hands-on fluency with workflow automation (Make.com, Python scripting) and AI-driven tooling (Claude, Antigravity CLI) through building my own B2B outbound systems, and I'm eager to bring that into the AI Cloud space.

As the founder of my own independent lead generation practice (CLG Project), I built and ran an end-to-end outbound system from scratch with no team or budget. By leveraging data-scraping workflows and AI copywriting tools, I sourced and qualified over 500 B2B prospects against strict ICP criteria. This structured approach allowed me to consistently generate 5–10 qualified leads per week and convert outreach into 3 discovery meetings with US decision-makers. I also independently managed the underlying technical infrastructure, setting up sender domain health protocols (SPF, DKIM, DMARC) across multiple domains.

Combined with my ongoing studies in Multimedia Engineering, my hands-on background in workflow automation and proactive pipeline generation equips me to contribute effectively to your commercial growth efforts.

Sincerely,

Daniil Kotelevets
