Professional Summary

Outbound Growth Specialist and BSc Multimedia Engineering student with hands-on experience building scalable, AI-powered prospecting engines. Proven track record of leveraging data-scraping workflows, automation (Make.com, Python), and targeted cold outreach to source and convert B2B prospects. Highly entrepreneurial and data-driven, focused on testing new channels, optimizing deliverability, and turning successful outbound experiments into repeatable, high-volume systems.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote.

- Built and ran an end-to-end outbound system from scratch—managing prospect sourcing, list enrichment, campaign sequencing, and domain infrastructure—utilizing Make.com (automation) and Python (data extraction).
 - Leveraged AI-powered tooling (Claude, Antigravity CLI, ChatGPT) to write, personalize, and A/B test cold email sequences, continuously optimizing hooks and CTAs to improve response rates.
 - Designed custom data-scraping workflows to build highly targeted prospect lists, successfully sourcing and qualifying 500+ B2B decision-makers against strict ICP criteria.
 - Managed high-volume outreach across Email and LinkedIn, tracking conversion data and generating a consistent 5–10 qualified leads per week.
 - Nurtured prospects without hard-pitching, ultimately converting outbound campaigns into 3 booked discovery meetings with US executives.
 - Architected and maintained sender domain health (SPF, DKIM, DMARC) across multiple sending domains to protect deliverability and scale campaign volume safely.
