To: Hiring Team

Company: LvlUp Ventures

Role: Outbound & Growth Intern / Associate

Dear Hiring Team,

I am writing to apply for the Outbound & Growth position. LvlUp's call to "Go Beyond Traditional Outreach" by testing new scraping approaches, AI personalization, and scalable systems describes exactly the methodology I used to build my independent lead generation practice.

When launching CLG Project, I didn't just execute a predefined list of tasks; I engineered the entire distribution engine from scratch. Operating with zero external budget, I utilized Python and workflow automation (Make.com) to scrape databases and build highly targeted lists, sourcing and qualifying over 500 B2B prospects. To maximize conversion, I integrated AI-powered tools (Claude, Antigravity CLI) to rapidly write, test, and personalize my cold email and LinkedIn sequences. This experimental, data-driven approach allowed me to consistently generate 5–10 qualified leads per week and book discovery meetings with US decision-makers.

I am highly entrepreneurial, comfortable managing complex outbound platforms (like Apollo.io and Instantly.ai), and obsessed with the technical foundation of outreach—such as setting up strict SPF, DKIM, and DMARC records to ensure campaigns actually land in the inbox. I would welcome the opportunity to bring my technical outbound skills to LvlUp Ventures to build repeatable systems that successfully source startups, investors, and strategic partners.

Sincerely,

Daniil Kotelevets
