To: Hiring Team, RedNovius

Role: Business Development Representative – Pharma & Life Sciences

Dear Hiring Team,

"You know how to open doors. We'll teach you the science."

When I read that line in your job description, I knew I had to apply. As an independent B2B Lead Generation Specialist, opening doors with senior decision-makers is what I do best, and I am highly motivated to learn the science behind RedNovius's visual solutions.

Over the past year, I built an outbound lead generation practice from scratch. Using LinkedIn Sales Navigator and deep account research, I sourced and qualified over 500 decision-makers. By crafting and continuously testing highly personalized digital campaigns (Email and LinkedIn), I consistently generated 5–10 qualified leads and secured 3 discovery meetings per week. I understand the critical difference between mere sales activity and a genuinely qualified commercial opportunity, which is why I rigorously manage my entire pipeline and follow-up strategy in HubSpot.

While my outreach strategy is focused on digital B2B channels rather than phone prospecting, my structured approach to account research and personalized messaging allows me to confidently approach senior professionals and turn those conversations into qualified pipeline. With fluent, professional-level English and a deep curiosity for complex industries, I am ready to bring my outbound execution to RedNovius.

Sincerely,

Daniil Kotelevets
