To: Hiring Team

Company: RemotePass

Role: Business Development Representative (EU)

Dear Hiring Team,

As an international B2B contractor operating from Spain, I live the exact problem RemotePass solves every day. I know firsthand how critical reliable global hiring and contractor management infrastructure is for businesses. When I saw your opening for an EU-focused BDR fluent in English and Spanish, I knew my background was a perfect fit.

I run my own B2B lead generation practice (CLG Project), where I act as the outbound growth engine for multiple tech clients. My day-to-day involves exactly what you are looking for: researching target EU markets, building robust pipelines, engaging decision-makers, and booking high-quality demos. To maintain high-volume outreach, I build advanced outbound systems (using Make.com and Python) that ensure my HubSpot data is flawless and my multichannel messaging (Email/LinkedIn) is hyper-personalized at scale.

While I am currently pursuing a BSc in Multimedia Engineering rather than a traditional Business degree, this technical background empowers me to deeply understand SaaS platforms and build advanced sales automations. Additionally, regarding the daily cold calling cadence: my highest-converting pipeline relies on AI-driven digital outbound followed by consultative discovery calls and targeted phone follow-ups. While I am fully comfortable picking up the phone to handle objections and qualify leads, my greatest value is building a digital outreach engine that brings prospects to the table already educated and interested in the RemotePass solution.

I am highly organized, passionate about global talent distribution, and ready to scale your pipeline.

Sincerely,

Daniil Kotelevets
