Professional Summary

BSc Multimedia Engineering student and technical professional with practical experience bridging business needs and technical solutions. Built an independent practice analyzing digital friction points and documenting business requirements for e-commerce clients. Proficient in managing operational workflows, automating processes (Make.com, Python), and utilizing CRM platforms (HubSpot, Salesforce). Organized, highly analytical, and seeking a part-time role to support international digital transformation projects.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote.

- Analyzed online stores (Shopify/e-commerce) for digital friction points (checkout flows, mobile page speed, cart abandonment) and documented business requirements to connect owners with technical web development agencies.
 - Acted as the primary point of contact between non-technical B2B prospects and technical solution providers, successfully translating business problems into actionable technology fixes.
 - Maintained strict documentation and pipeline tracking using CRM platforms (HubSpot, Salesforce).
 - Built and ran an end-to-end technical outbound system from scratch, setting up domain infrastructure (SPF, DKIM, DMARC) and data-scraping workflows without team support.
 - Configured workflow automation tools (Make.com, Python) and utilized AI (Claude, ChatGPT) to optimize lead generation processes.
 - Sourced and qualified 500+ B2B prospects, generating 5–10 qualified leads per week and securing 3 discovery meetings with US decision-makers.
-

Skills

- **Business Analysis & Operations:** Requirement Documentation, Technical Workflow Analysis, Digital Transformation Support, A/B Testing, Process Automation (Make.com)
