To: Hiring Team

Company: Seeq Corporation

Role: Business Development Representative - Americas

Dear Hiring Team,

With a deep passion for technology and a results-driven operating style, I am incredibly excited to apply for the remote Business Development Representative position at Seeq. Your mission to help companies seamlessly extract insights from industrial process data is highly compelling, and I am eager to help build your Americas pipeline by connecting those business needs to your solutions.

Over the past year, I built and managed an independent B2B lead generation practice from scratch. Working in a completely remote environment, I extensively researched target accounts and sourced over 500 qualified prospects based on strict Ideal Customer Profiles. By creating and executing strategic outbound campaigns via email and LinkedIn, I successfully nurtured quality leads and booked discovery meetings for senior stakeholders. I am highly meticulous when it comes to tracking activities, touches, and account information in CRMs like Salesforce and HubSpot, ensuring that no opportunity slips through the cracks.

While my primary outbound success has been heavily driven by written strategic campaigns, I possess a strong sense of urgency, high coachability, and a deep willingness to integrate aggressive outbound calling efforts into my daily pipeline generation. Furthermore, my primary territory has historically been US-based B2B accounts, which aligns perfectly with your focus on the Americas. Finally, as per your requirements, I am fully authorized to work in my country of residence (Spain) and am fully equipped to operate as a dedicated remote contributor to your fast-paced team.

I would welcome the opportunity to discuss how my resourcefulness can help drive new opportunities for Seeq.

Sincerely,

Daniil Kotelevets
