To: Hiring Team

Company: Stanley Black & Decker, Inc. (CribMaster)

Role: Business Development Representative EMEA

Dear Hiring Team,

I am writing to apply for the Business Development Representative EMEA position at CribMaster. When reviewing your job description, I was immediately drawn to your requirement that "knowledge of AI and automation tools for prospecting is a significant plus." As a B2B lead generation specialist managing my own practice (CLG Project), I have built my entire outbound engine around these exact tools.

I utilize Python for data extraction, Make.com for workflow automation, and Claude (LLMs) to deeply personalize my outreach across LinkedIn Sales Navigator and Email. This AI-augmented approach, combined with rigorous pipeline management in Salesforce and Apollo.io, allows me to consistently generate 5–10 qualified leads per week. Furthermore, I am fluent in English, Spanish, and Russian, which directly aligns with your advantage of knowing 3+ European languages for the EMEA market.

While my background is not directly in aerospace or manufacturing, my technical education (BSc Multimedia Engineering) allows me to quickly understand and communicate complex, software-driven solutions like CribMaster. Additionally, while my high-volume prospecting relies primarily on AI-driven digital channels rather than traditional cold calling, I am highly comfortable leading discovery meetings and navigating multi-stakeholder buying groups. I am based in Spain with full work authorization and am fully prepared to travel up to 35% across EMEA.

Sincerely,

Daniil Kotelevets
