To: Hiring Team / Founder

Company: THINKPOL

Role: OSINT Analyst (Pre-Sales) H/F

Dear Hiring Team,

I am writing to apply for the OSINT Analyst (Pre-Sales) position at THINKPOL. While my background is rooted in B2B lead generation rather than traditional security or intelligence studies, the core mechanics of my day-to-day work—running data-scraping workflows, resolving identities across digital platforms, and mapping organizational networks—translate directly to the investigative rigor required for pre-sales OSINT operations.

As the founder of my own independent lead generation practice (CLG Project), I built end-to-end data extraction and outreach systems from scratch. Using Python scripting and automation tools, I have successfully sourced, verified, and mapped the digital footprints of over 500 prospects across the US e-commerce sector. This process requires me to track down decision-makers, verify their technical infrastructure (such as sender domain health), and synthesize that data into actionable outreach. This hands-on experience in structured data recovery and rigorous sourcing aligns closely with your need to turn prospect problems into real, recovered intelligence.

As a BSc Multimedia Engineering student studying on a fully remote and flexible schedule, I am well-equipped to support your pre-sales casework and share the investigative workload. I look forward to the opportunity to contribute my data-scraping and analytical skills to the THINKPOL team.

Sincerely,

Daniil Kotelevets
