Professional Summary

B2B Business Development professional and BSc Multimedia Engineering student with direct, hands-on experience managing email deliverability and sender domain infrastructure. Through building an independent outbound lead generation practice, I gained practical expertise in configuring SPF, DKIM, and DMARC protocols to protect domain reputation and ensure high inbox placement. Highly organized and accustomed to conducting structured, high-volume B2B outreach to secure qualified discovery meetings.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote.

- Set up and maintained sender domain health (SPF, DKIM, DMARC) and mailbox warm-ups to protect deliverability across multiple sending domains.
 - Built and ran an end-to-end outbound system from scratch — prospect sourcing, list enrichment, campaign sequencing, and inbox/domain infrastructure — with no team or budget support.
 - Sourced and qualified 500+ B2B prospects using structured ICP criteria and data-scraping workflows, then segmented them for targeted outreach.
 - Generated a consistent 5–10 qualified leads per week and converted outreach into 3 discovery meetings with US decision-makers.
 - Wrote and A/B tested cold email sequences using AI copywriting tools, iterating on subject lines and CTAs to improve open and reply rates.
 - Pivoted the practice to the Shopify/e-commerce space — analyzing online stores for conversion issues and connecting store owners with vetted web development agencies.
-

Skills

- **Outbound & Sales:** B2B Lead Generation, Cold Outreach, Prospecting, Lead Qualification, Email Deliverability, A/B Testing
