To: Hiring Team / Founder

Company: Talnir

Role: Business Development Representative

Dear Hiring Team,

I am writing to apply for the Business Development Representative position at Talnir. As someone who built a B2B outbound system from scratch for my own independent lead generation practice, I know firsthand what happens when email authentication is misconfigured. To protect my own outreach, I personally set up and maintained sender domain health across multiple domains, managing SPF, DKIM, and DMARC records and mailbox warm-ups to secure inbox placement. This direct, technical experience means I understand the exact pain points Talnir resolves for its clients and can confidently open conversations around verified email security issues.

Through my practice (CLG Project), I sourced and qualified over 500 B2B prospects using structured criteria, generating a consistent 5–10 qualified leads per week and securing 3 discovery meetings with US-based decision-makers. I am deeply familiar with structured outreach, managing multiple prospect conversations simultaneously, and utilizing platforms like LinkedIn Sales Navigator and Apollo.io to qualify interest.

Because I am completing my BSc in Multimedia Engineering on a flexible schedule, I am ideally positioned for the part-time, 3-hour-per-day commitment this role requires. I would welcome the opportunity to discuss how my hands-on background in both domain infrastructure and pipeline generation can help book qualified discovery calls for Talnir.

Sincerely,

Daniil Kotelevets
