To: Hiring Team

Company: Truss

Role: Sales Development Representative

Dear Hiring Team,

I am writing to apply for the Sales Development Representative position at Truss. When I saw that you are building an *agentic* AI tax workflow platform, I knew I had to apply. I actively use agentic AI tools (Claude, Antigravity CLI) alongside Python and Make.com to automate my own outbound pipeline, so I deeply understand the immense efficiency this technology can bring to modern CPA firms.

Through my independent B2B lead generation practice (CLG Project), I developed a highly automated outbound engine from scratch. I built data-scraping workflows to source and qualify over 500 B2B prospects, tracked every interaction meticulously in Salesforce and Apollo.io, and successfully generated 5–10 qualified leads per week. By rigorously A/B testing my sequences, I converted cold outreach into 3 booked discovery meetings with US executives.

While my outbound methodology relies exclusively on high-volume digital channels (Email and LinkedIn) rather than cold-calling, this highly automated, data-driven approach allows me to independently generate qualified meetings with key decision-makers at scale. I am highly motivated to bring my technical literacy and rigorous prospecting discipline to help Truss scale its sales pipeline.

Sincerely,

Daniil Kotelevets
