Professional Summary

B2B Lead Generation professional and BSc Multimedia Engineering student with hands-on experience building AI-driven automation workflows. Proven ability to source, qualify, and convert B2B prospects using structured processes and CRM systems (HubSpot, Salesforce). Disciplined, metric-oriented, and ready to apply rigorous lead qualification criteria to fast-paced inbound pipelines.

Experience

Founder & Lead Generation Specialist — CLG Project

Jul 2025 – Present | Independent practice, remote.

- Wrote and A/B tested cold email sequences using AI copywriting tools, iterating on subject lines and CTAs to improve open and reply rates.
 - Sourced and qualified 500+ B2B prospects using structured ICP criteria and data-scraping workflows, then segmented them for targeted outreach.
 - Generated a consistent 5–10 qualified leads per week and converted outreach into 3 discovery meetings with US decision-makers.
 - Built and ran an end-to-end outbound system from scratch — prospect sourcing, list enrichment, campaign sequencing, and inbox/domain infrastructure — with no team or budget support.
 - Set up and maintained sender domain health (SPF, DKIM, DMARC) and mailbox warm-ups to protect deliverability across multiple sending domains.
 - Pivoted the practice to the Shopify/e-commerce space — analyzing online stores for conversion issues and connecting owners with vetted web development agencies.
-
