To: Hiring Team

Company: Vystral

Role: SDR (fijo + comisiones, 100% remoto)

Dear Hiring Team,

I am writing to apply for the SDR position at Vystral. Your focus on transforming manual workflows into AI-driven assets resonates strongly with me. In my independent lead generation practice (CLG Project), I built my own B2B outbound systems from scratch, actively configuring AI and automation tools—specifically Make.com, Claude, and the Antigravity CLI—to scale prospect sourcing and qualification.

While my background has centered on digital outbound rather than high-volume phone sales, the core discipline of rigorous prospect qualification remains exactly the same. I successfully sourced and qualified over 500 B2B prospects against strict ICP criteria, generating 5–10 qualified leads per week and securing 3 discovery meetings with decision-makers. I am deeply accustomed to maintaining strict pipeline hygiene in CRMs (such as HubSpot and Salesforce), tracking conversion metrics, and operating with a high degree of autonomy.

I understand Vystral demands a highly structured, metric-driven approach to inbound qualification and show rates. I am highly disciplined, comfortable executing scripted processes, and ready to apply my technical background and qualification skills to your inbound pipeline over the phone.

Sincerely,

Daniil Kotelevets
