To: Hiring Team

Company: WIN SOURCE

Role: Sales Representative

Dear Hiring Team,

I am writing to apply for the Sales Representative position at WIN SOURCE. I was immediately drawn to your focus on developing early-career professionals who are eager to independently build international customer relationships. As someone who has built an autonomous B2B lead generation practice from the ground up, I have the execution skills and customer development awareness needed to succeed in this role.

Through my independent project (CLG Project), I took full ownership of the B2B pipeline. I utilized Python and data-scraping workflows to search for and organize over 500 highly targeted customer leads. I then built initial contact using structured Email and LinkedIn sequences, generating a consistent 5–10 qualified leads per week. To ensure no opportunity was lost, I meticulously maintained all customer information and follow-up records in Salesforce and Apollo.io, successfully moving conversations forward to book meetings with US decision-makers.

While I do not have prior experience in electronic components, I am a fast learner pursuing a BSc in Multimedia Engineering—a technical foundation that helps me quickly grasp complex international supply chains. Although my outreach expertise focuses strictly on digital channels (Email and LinkedIn) rather than phone prospecting, my proven ability to independently source leads, maintain rigorous CRM hygiene, and proactively follow up makes me a strong fit for your team. I am fully fluent in English and Spanish, and I am ready to start my career in the global electronics supply chain with WIN SOURCE.

Sincerely,

Daniil Kotelevets
