To: Nicole Kelly & Hiring Team

Company: Xcitium

Role: Business Development Executive (Entry Level) – Cyber Security

Dear Nicole Kelly and the Hiring Team,

As a highly technical Lead Generation Specialist who built an end-to-end outbound system from scratch, I am very excited to apply for the Business Development Executive role at Xcitium. Based in Spain, I am perfectly positioned to support your rapid sales growth across European countries in a remote capacity.

Through my independent practice, I have proactively sourced and qualified over 500 B2B prospects using structured ICP criteria and data-scraping workflows. By systematically utilizing LinkedIn Sales Navigator and A/B testing my email outreach, I generated a consistent 5–10 qualified leads per week. I am highly comfortable logging all opportunities accurately in CRM systems like HubSpot and Salesforce, and I have successfully converted initial outreach into discovery meetings with decision-makers. My ongoing studies in Multimedia Engineering, combined with hands-on technical skills in Python and domain infrastructure, equip me with the technical aptitude needed to quickly grasp cyber security concepts and assist with complex RFP responses.

I am a proactive self-starter who thrives in fast-paced environments. I would welcome the opportunity to discuss how my prospecting skills and technical background can help identify new leads and support your senior team members at Xcitium.

Sincerely,

Daniil Kotelevets
